

Expression of Interest – NRM Committee Representative

Are you interested in being part of the Break O'Day Council Natural Resource Management Committee? The Committee works with Council on the many ways our natural environment and resources are important to our community, economy and in their own right?

The NRM Committee is a Special Committee under the *Local Government Act 1993*, constituted by Council's Charter document. The Charter specifies Committee membership, representation required from various sectors, and outlines the Committee's responsibilities to Council. Membership is voluntary and the Committee meets four times per year, typically with a morning field trip followed by an afternoon meeting.

If you are interested in any of the roles on the Committee, Council would like to hear from you.

There are vacancies currently for Community, Agriculture and Education representatives.
