Planning Scheme Response

Clause 8.3.2 Visitor Accommodation
Performance Criterion P2

Property:

Lot 1 SP181006

1/15 Susan Court, St Helens

Proposal:

Additional Use – Visitor Accommodation

Introduction

This application seeks approval for visitor accommodation within the existing dwelling located at Lot 1 SP181006, 1/15 Susan Court, St Helens.

No building works, additions, extensions, alterations to access arrangements or changes to the physical layout of the site are proposed.

Visitor accommodation will be limited to a maximum of two guest bedrooms within the existing dwelling.

Response to Performance Criterion P2

(a) Privacy of residents

The proposal utilises an existing detached dwelling and does not involve any building works or changes to the existing layout of the site. The use of the dwelling for visitor accommodation will not create additional overlooking or loss of privacy beyond that associated with normal residential occupation.

(b) Any likely increase in noise

The proposal is small in scale and limited to accommodation within an existing dwelling. Occupancy will be restricted to guests staying within the dwelling and is not expected to generate unreasonable noise impacts on neighbouring residents.

(c) The residential function of the strata scheme

The strata scheme consists of two detached residential dwellings. The adjoining strata lot already has approval for visitor accommodation use. The proposal is therefore consistent with the existing planning framework applying to the strata scheme and does not diminish the residential character of the development.

(d) The location and layout of the strata lots

The existing layout provides separation between the two dwellings, with independent living areas, parking arrangements and outdoor spaces. The configuration of the site supports visitor accommodation while maintaining residential amenity for occupants of both strata lots.

(e) The extent and nature of any other non-residential uses

The proposal relates solely to visitor accommodation within an existing dwelling. No commercial activities, functions, events, food service operations or other intensive non-residential uses are proposed.

The accommodation will be limited to a maximum of two guest bedrooms and is considered a low intensity use compatible with the surrounding residential area.

(f) Any impact on shared access and common property

Existing access arrangements will continue to be utilised.

Two vehicles can be accommodated on-site, comprising the existing carport and an additional vehicle parking space within the existing turning area.

The proposal is not expected to create unreasonable traffic generation, parking demand or impacts on common property or shared access arrangements.

Conclusion

Having regard to the matters listed in Clause 8.3.2 Performance Criterion P2, the proposal will not cause an unreasonable loss of residential amenity to long-term residents occupying other strata lots within the strata scheme.

The proposal is low impact, compatible with the residential character of the area and consistent with the existing visitor accommodation approval already applying to the adjoining strata lot.

Accordingly, the proposal satisfies the requirements of Clause 8.3.2 P2 of the Tasmanian Planning Scheme.
